

Hi Cloud – Power 150W dimmable

HI CLOUD 150 W

SEA WATER

Created to generate the best strategies of photoperiod in the freshwater stage (fish farms) with the aim of improving productivity and changes physiological in the fish for this stage (smoltification).

These features make Hi Cloud the best solution for this problem, because being dimeable allows a greater adaptation of the fish against the intensity of light.

This equipment, in addition, adapts to requirements industries, such as processing of food it is essential to have lighting adequate, that don't contain toxic materials, highly resistant to corrosion.

These luminaires are low-maintenance and especially safe.

TECHNICAL SPECIFICATIONS

MODELO	HI CLOUD
Consumption	150 watts
Power	50W to 300W.
Luminous efficienc	140Lm/W & 160 Lm/W
Degree of protection	IP65. IK10
Installation	Multiple installation ways available.
Protection	IP66
Application	Process plants / fish farms
Color	Black/White
Material	aluminum
Temperature	30°C a 50°C
