

COPPER ILED PHOTOPERIOD LAMP 1.000 W

COPPER ILED LAMP 1000 W

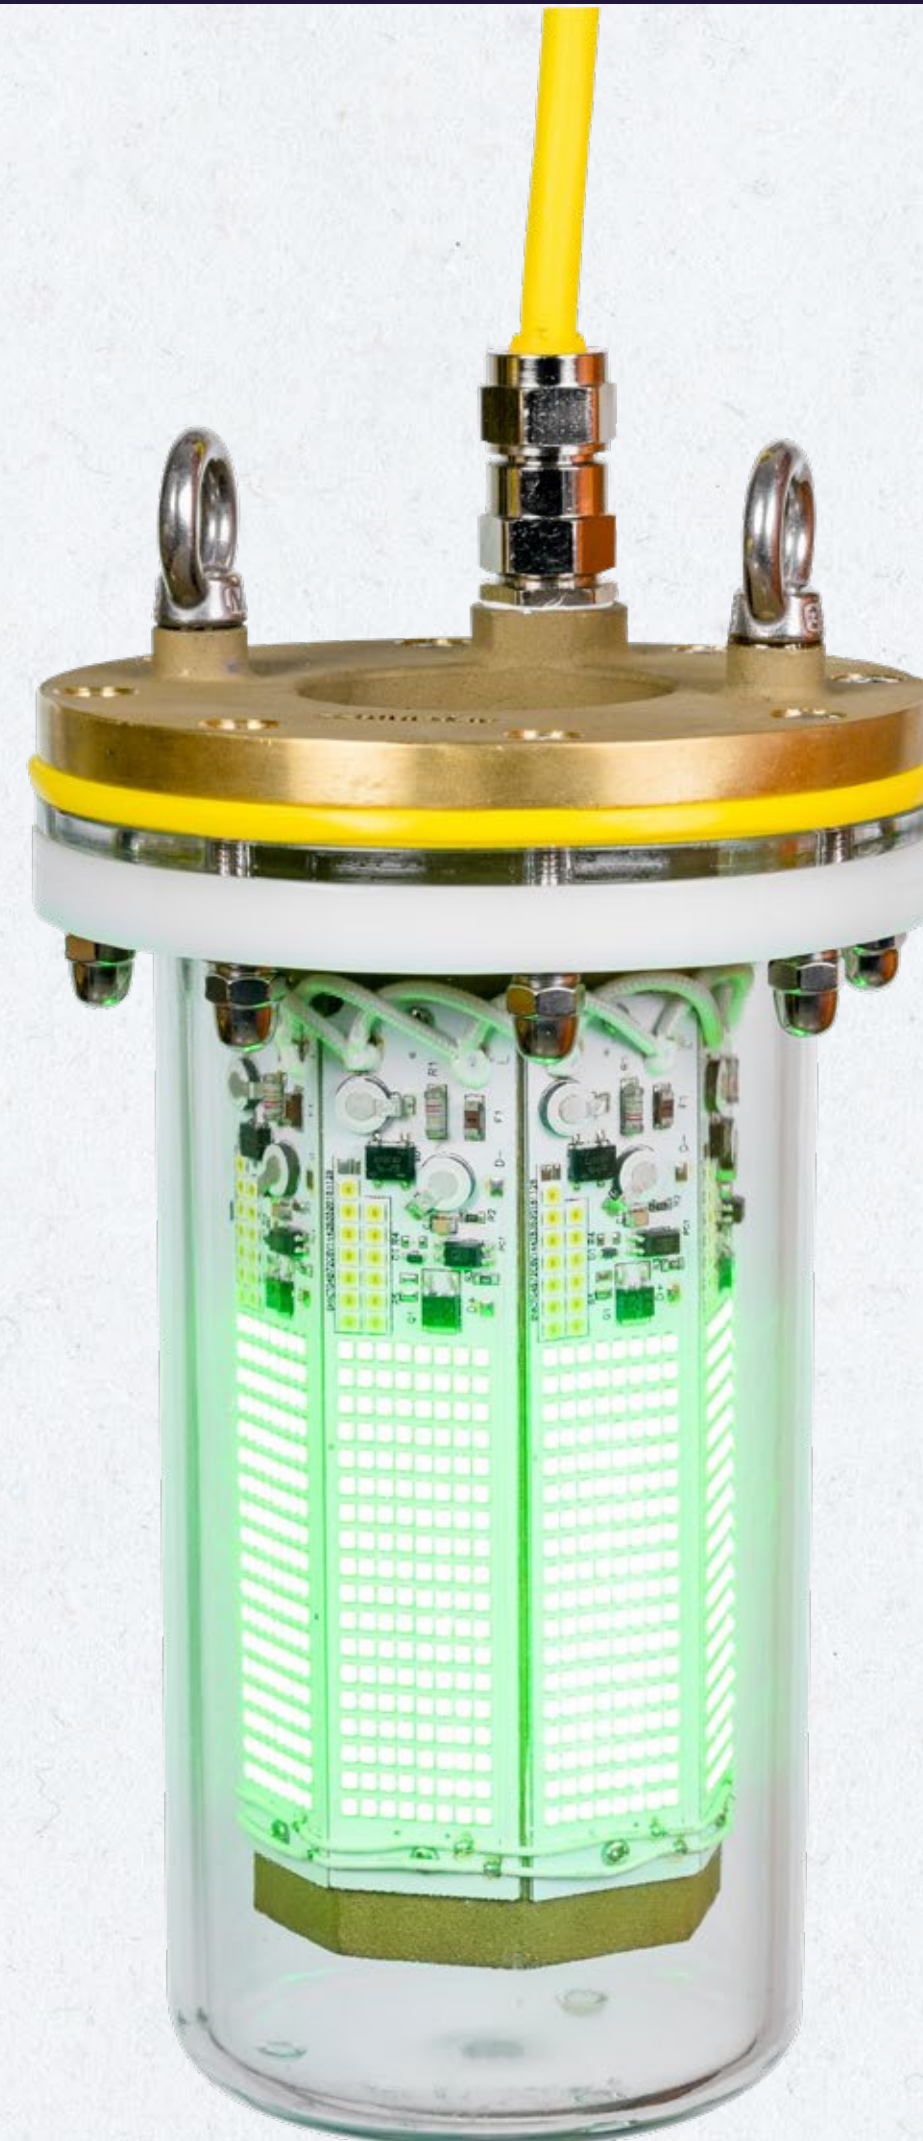

Multipurpose

Luxmeter makes its new iLED product available to its customers, with the aim that they have the best equipment on the market.

Our lamp from the iLED Copper 1.000W line is made entirely of copper, a unique metal that is ideal for this application, as it's characterized by antibacterial properties, which makes it a low-maintenance for cleaning organic/fouling. Another of its properties is that it's a recyclable and high-cooling material for its internal electronic system.

The technology of its NICHIA LEDs (Made in Japan) give us the highest luminous efficiency in the industry, increasing light levels and performance by 30% compared to other lamps on the market.

Thus ensuring a long useful life and better quality in LED lighting.

Consumption	1.000 W of power
Luminous efficiency	210 Lm/W
Features	Dimmable
Weight (includes cable KG)	15.2 kg
Cable length	50 m long
Color	35MM GreenColor 35MM Green
Useful life	50,000H
Application	Applicable to multipurpose rafts, cages and culture ponds.
